(a) Securities traded on a national securities exchange are valued at the last reported sales price on the principal exchange on which the security is listed on the last business day of the period; securities traded in the over-the-counter market are valued in accordance with NASDAQ Official Closing Price on the last business day of the period; securities traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the mean between the last reported bid and asked prices.

Securities traded on a foreign exchange are valued at the Official Closing Price on the last business day of the period on the principal exchange on which the security is primarily traded. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at the close of the New York Stock Exchange on that day.

U.S. Treasury Bills with remaining maturities of sixty days or less are valued at their amortized cost. U.S. Treasury Bills that when purchased have a remaining maturity in excess of sixty days are stated at their discounted value based upon the mean between the bid and asked discount rates until the sixtieth day prior to maturity, at which point they are valued at amortized cost.

When reliable market quotations are insufficient or not readily available at time of valuation or when the Investment Adviser determines that the prices or values available do not represent the fair value of a security, such security is valued as determined in good faith by the Investment Adviser, in conformity with guidelines adopted by and subject to review by the Board of Directors.

Purchases and sales of foreign portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities are acquired or sold.

(b) Non-income producing.

(c) "Miscellaneous Securities" include holdings in their initial period of acquisition that have not previously been publicly disclosed.

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in the three broad levels listed below:

Level 1 – quoted prices in active markets for identical securities

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. During the period ended September 30, 2013, there were no significant transfers into and out of Level 1 and 2 measurements in the fair value hierarchy. There were no Level 3 securities held in the Fund during the period ended September 30, 2013.

The following is a summary of the inputs used to value the Fund's investments as of September 30, 2013:

Valuation Inputs	Common Stocks	U.S. Government Obligations	Total
Level 1 – Quoted Prices	\$6,062,860,091		\$6,062,860,091
Level 2 – Other Significant Observable Inputs	—	\$1,290,993,047	1,290,993,047
Total	\$6,062,860,091	\$1,290,993,047	\$7,353,853,138
